Find the right size for your customer following our step-by-step guide

When it comes to bras, base your measurements on a well-fitting bra, preferably one without underwires

The measured size serves as a guideline. The actual size for the best comfort of each customer can only be determined by trying the item on!

Underbust measurement (1)

Take the measurement by holding the tape directly under the bust.
This measurement determines the bra size.

Bust measurement (2)

Place the tape directly over the widest point of the breast without digging in.

Use the chart to find out the cup size

Pants size

To work out the pants size, measure the waist **(3)** by holding the tape horizontally around the smallest part of the waist. Measure the hips **(4)** by holding the tape horizontally around the widest part of the hips.

If there is a considerable difference between the waist and hip measurement, always take the larger size.

Employed materials and their advantages

Less movement

An optimum sports bra can significantly reduce the upward and downward movement of the sensitive breast tissue

The easy-care CoolMax® net is soft and breathable. It transports the moisture away from the body, dries very quickly and therefore ensures a cool and pleasant skin milieu.

Anita Sweat Management

The interaction of two breathable hi-tech fabrics permits optimum, active "Sweat Management"

Microfibre

Microfibre – The ultimate comfort fabric
Light and silky soft
Breathable for optimum skin milieu
Easy to care for (fast-drying, non-iron)
