BAUERFEIND. BY PEOPLE FOR PEOPLE. FOR A BETTER QUALITY OF LIFE.

Bauerfeind AG is one of the world's leading manufacturers of medical aids. With our products and treatment concepts, we enable people to be more active and thus make an important contribution toward maintaining and restoring health.

MEDICAL KNOW-HOW AND TECHNICAL EXPERTISE

Bauerfeind combines decades of expertise in technology and manufacturing with innovation: the tradition of a medium-sized, family-run business with a global mindset. Bauerfeind's specialists have worked very closely with physicians, scientists, and developers right from the start. The result: patented, award-winning products and services.

From the thread to the completed product, our compression stockings are developed and manufactured in Germany.

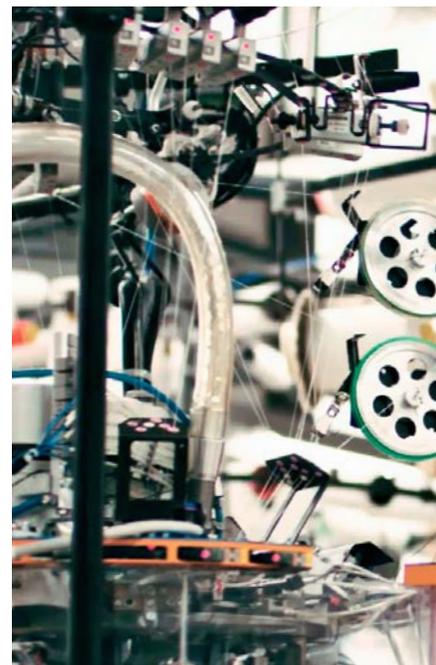

EFFECTIVE VARIETY

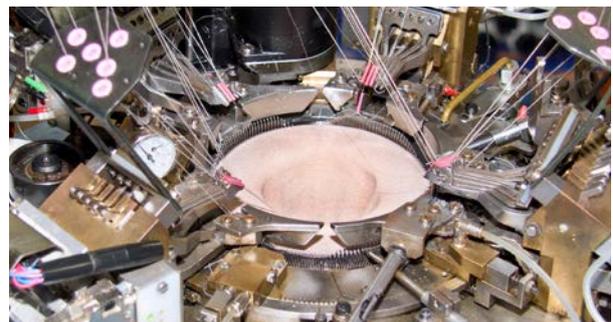

Our VenoTrain compression stockings cover all uses/indications in modern compression therapy, offering medically proven effectiveness and unique material properties.

Thanks to the wide range of colors available, the compression products blend seamlessly into their users' everyday lives and can be combined with various fashion styles. For prevention or the treatment of lymphedema: the indication-specific solutions include a wide variety of circular knit and flat knit designs that are available as custom-made or standard products.

QUALITY WITHOUT COMPROMISE

Bauerfeind products don't simply meet standards – they fulfill the most stringent requirements in terms of quality, effectiveness, and wearing comfort. This is confirmed by regular inspection procedures, for which our products are permitted to bear the seals and marks after successful testing. All VenoTrain products conform to the requirements of the German Medical Devices Act (MPG) and bear the RAL quality mark. As a seal of quality, the STANDARD 100 by OEKO-TEX® guarantees testing for harmful substances.

THE FOUR PILLARS OF COMPRESSION THERAPY

TREATMENT OPTIONS BASED ON MEDICAL INDICATIONS

01

PREVENTION (page 16–21)

The VenoTrain act **support stockings** offer beneficial relief for the legs and prevent vein problems. They improve circulation and keep legs fit when sitting or standing for long periods of time.

02

STANDARD PHLEBOLOGICAL TREATMENT

(page 22–37)

The standard phlebological treatment is suitable for **mild to moderate venous disorders**. It also includes situations in which there is a particular risk for the development of vein problems, such as during pregnancy or traveling.

VenoTrain compression stockings, which have been developed precisely for these cases, improve venous activity and combat venous leg problems.

03

SPECIAL PHLEBOLOGICAL TREATMENT

(page 38–49)

Some patients with vein problems have **special requirements** that call for compression stockings with unique modes of action and properties. These requirements can be very diverse.

That is why the VenoTrain special case range offers compression stockings especially for patients with restricted mobility, dry skin, pronounced venous insufficiency or venous leg ulcers.

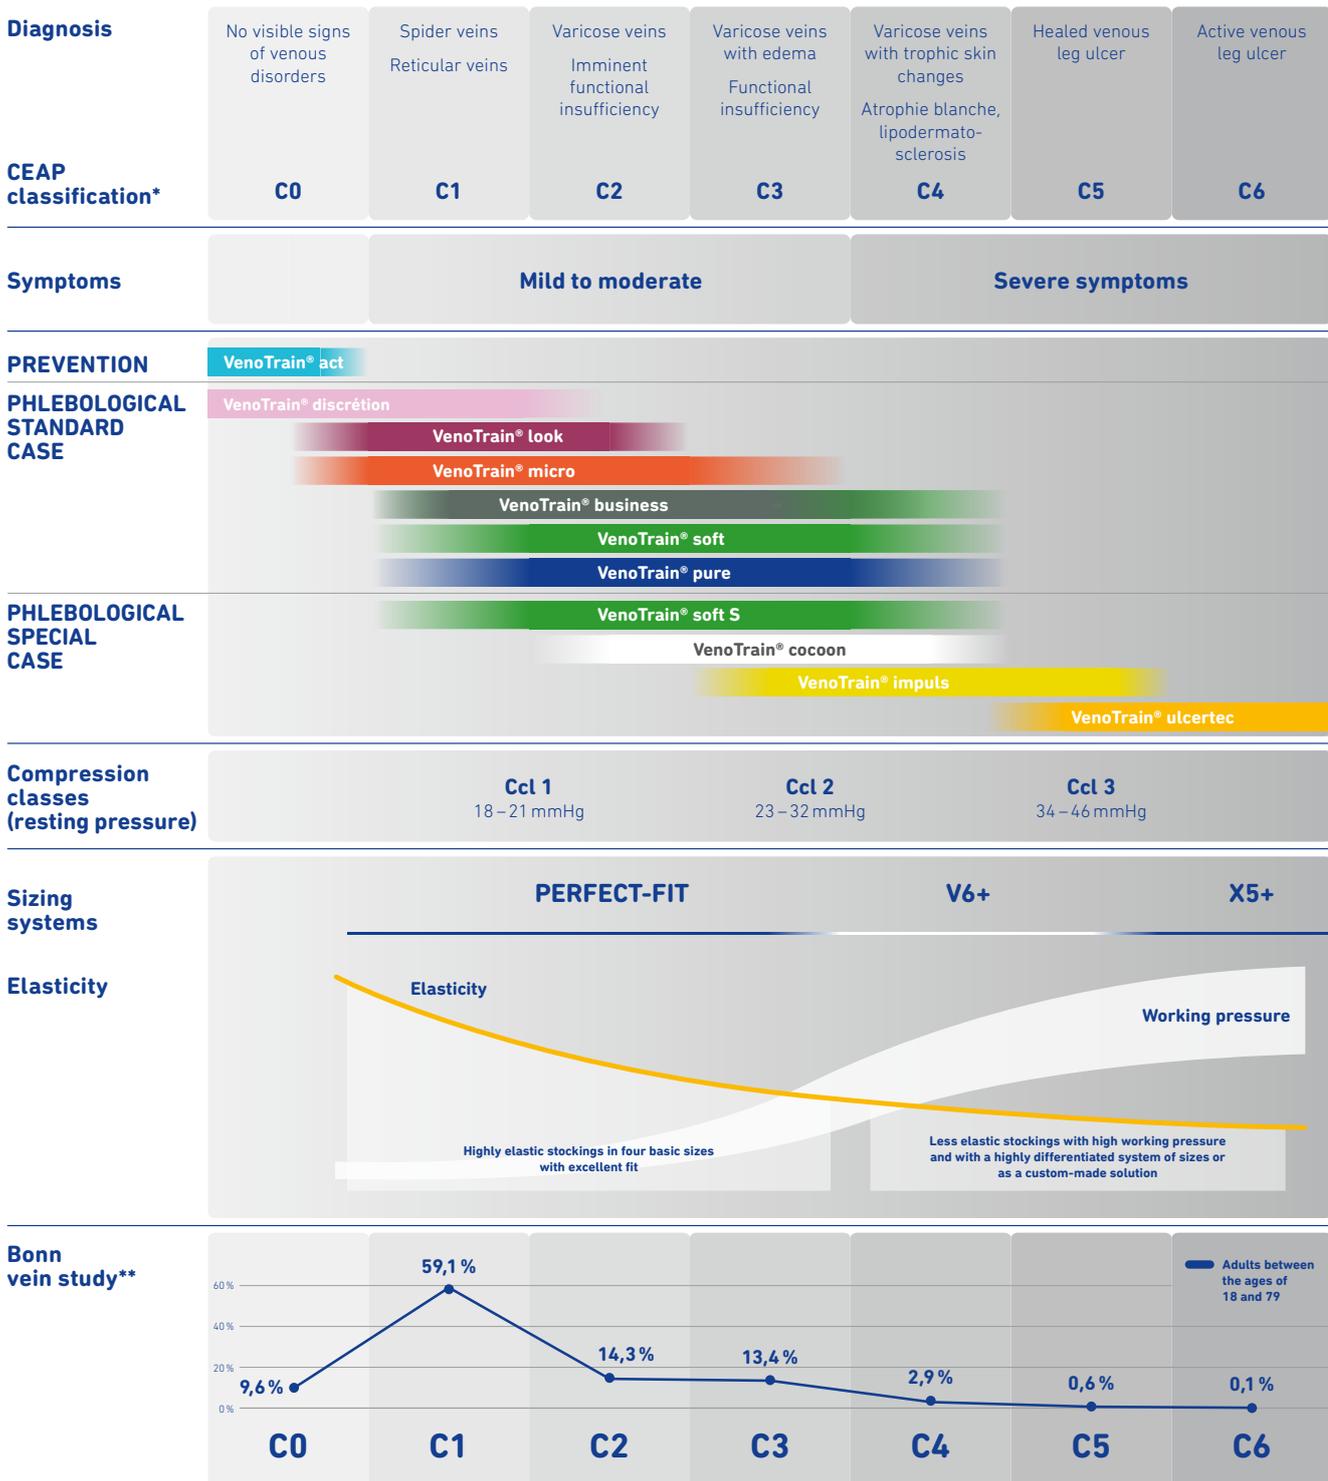

04

LYMPHOLOGICAL TREATMENT (page 50–51)

Lymphedema or lipedema patients are generally dependent on compression therapy for their entire lives. The effectiveness and wearing comfort of the stockings are therefore particularly important, significantly impacting the patient's quality of life. VenoTrain flat knit and circular knit products generate the required therapeutic compression, whilst offering a unique wearing comfort, and help the patient live an active life.

A SYSTEMATIC APPROACH TO COMPRESSION FOR THE RIGHT CHOICE

The Bauerfeind systematic approach will help you find the right VenoTrain compression stocking for your customers. The right choice depends on the severity of the condition.

THE NEW COLOR SYSTEM

SIMPLE. CLEAR. COORDINATED.

SELECTING THE RIGHT COLOR HAS NEVER BEEN EASIER

The new VenoTrain color system makes it even easier for you and your customers to select the right color: Now, the circular knit VenoTrain medical compression stockings for mild to advanced vein problems – VenoTrain look, VenoTrain micro, VenoTrain soft, VenoTrain business and VenoTrain impuls – as well as the flat knit product VenoTrain curaflow, are all available in the colors Caramel, Navy, Anthracite and Black.

The popular variants VenoTrain micro and VenoTrain soft are also offered in the light skin tone Cream, the darker skin tone Amaretto, and the warm brown tone Espresso.

THE BENEFITS OF THE NEW COLOR SYSTEM FOR YOU:

- Coordinated color selection for the entire VenoTrain range
- Easy and quick overview of all products and their corresponding colors
- Personalized and straightforward customer advice

EDGING AND TOP BANDS

PERFECT HOLD WITH A HIGH LEVEL OF COMFORT

Our edging and top bands make sure that compression stockings fit securely and don't slip. Their soft materials are breathable, gentle on the skin and very comfortable to wear. Learn more about the individual styles and different designs.

EDGING

SECURE AND COMFORTABLE

TOP BAND

For all knee-high compression stockings

The soft edging ensures wearing comfort and doesn't dig into the skin. Its neutral look works for both women and men.

COMFORT BANDS

For the Venotrain look and Venotrain soft pantyhose (standard)

This edging provides an excellent fit and a high level of comfort thanks to its higher elasticity and wide band. It sits comfortably without constricting.

SILICONE TOP BANDS

SECURE AND INDIVIDUALIZED

SILICONE MICRO DOTS

For Venotrain look (standard and custom-made)

The highly elastic silicone top band with its small, flat silicone dots is very inconspicuous, even when worn under tight clothing, and leaves no marks on the skin. The skin-friendly material with its soft surface adapts perfectly to the leg contour and is very comfortable to wear even with soft connective tissue. The silicone top band comes in one width for each size and no longer needs to be produced in both the regular and wide size.

SILICONE DOTS

For Venotrain micro, Venotrain soft, Venotrain pure, Venotrain soft S and Venotrain impuls (standard and custom-made)

Our classic silicone top band is mainly used for thigh-high stockings. It is gentle on the skin and ideal for men thanks to its neutral design.

GARTER BELT

For Venotrain soft and Venotrain impuls (standard and custom-made)

The garter belt without silicone coating improves the hold of the stockings and offers plenty of freedom of movement. It is suitable for sensitive skin and can be worn on one or both sides.

SILICONE DOT PATTERN

For Venotrain look (custom-made), Venotrain micro, Venotrain soft and Venotrain soft S (standard and custom-made)

This skin-friendly silicone top band with its elegant pattern is especially popular with women.

LACE

For Venotrain soft (custom-made)

The curved, flat coating is breathable and provides a good hold. Its lace design is especially appealing to women.

LACE SENSITIVE

For Venotrain look and Venotrain micro (standard and custom-made)

The highly elastic silicone top band has an ultra-thin, continuous coating that provides a perfect hold. It adapts perfectly to the leg contour, even with soft connective tissue. The silicone top band comes in one width for each size and no longer needs to be produced in both the regular and wide size.

HELLO NEW ATTITUDE TOWARD LIFE!

A NEW LOOK FOR LYMPHOLOGICAL THERAPY

Every day is more pleasant when you're feeling better. That is why Bauerfeind tirelessly works on product innovation.

+ NEW TOE CAP, NOW ALSO WITHOUT IRRITATING SEAMS

- + GLOVE WITHOUT IRRITATING FINGER SEAMS

- + SPECIALLY DESIGNED COMFORT ZONES
- + EXTRA SOFT BEHIND THE KNEE
- + SEAMLESS AND ANATOMICALLY SHAPED 3D CHEST AREA, TOE WITH SOFT TIP AS STANDARD

FOR MORE MOBILITY AND COMFORT DURING EVERYDAY ACTIVITIES

With the VenoTrain curaflow, we are offering flat knit products that ensure unique wearing comfort when therapeutic compression is required. For patients with lipedema and lymphedema, our products make everyday activities less complicated.

STYLISH CONTRASTS

The different colors are very popular with women who wear compression stockings because they can be combined with a variety of outfits. Anthracite, in particular, represents classic elegance. Exciting contrasts can be created with the bordeaux hue.

Detailed information about products for lymphedema and lipedema can be found in the Lymphology Product Catalog (item number 271 4210 1001 001) as well as in the current price list.

QUALITY THAT CAN BE MEASURED.

TREATMENT IN PHLEBOLOGICAL STANDARD CASES

FOR MILD TO MODERATE VENOUS PROBLEMS

The standard phlebological treatment is suitable **for mild to moderate venous disorders**. It also includes situations in which there is a particular risk for the development of vein problems, such as during pregnancy or traveling. VenoTrain compression stockings, which have been developed precisely for these cases, improve venous activity and combat venous leg problems.

VenoTrain® soft S

COMFORT IN THE EVENT OF RESTRICTED MOBILITY

Based on proven VenoTrain soft quality which offers a gentle massage effect to stimulate the blood flow, the VenoTrain soft S also takes into account special requirements of people who spend most of their time seated.

The wide heel and comfortable instep area ensure that the foot, which is angled during sitting, has enough space, and that no creases can develop.

The robust knitted fabric can withstand plenty of wear, and can also be easily put on by care staff.

FEATURES

- Wide heel area
- Adapted to the typical anatomical foot posture while sitting (90-degree angle)
- Breathable material with a revitalizing effect

VenoTrain® cocoon

FOR DRY AND SENSITIVE SKIN

The medical compression stocking with innovative dual function protects and soothes dry and sensitive skin.

High-quality skincare substances repair the natural skin barrier, making dry skin more supple.

FEATURES

- Clinically tested skincare substances with cosmetic effect
- Clinically proven skin-friendliness
- With an innovative mix of natural fibers
- The lipid care complex improves skin hydration and counteracts itching and scaling
- For men and women

VenoTrain® cocoon

THE COMPRESSION STOCKING WITH A DUAL EFFECT

It is common for patients wearing compression stockings to be affected by dry skin. Bauerfeind was able to develop a compression stocking which combines compression with long-lasting skincare, turning a compression stocking into a feel-good compression stocking. This is possible with the "magical" fibers contained in the VenoTrain cocoon.

NEW
in two foot lengths

The VenoTrain cocoon medical compression stocking has a unique dual function for people with vein problems: compression and long-lasting skincare in one.

- + **With integrated cocoon skincare fibers made from cellulose, cotton, and a lipid skincare complex**
- + **Aids skin regeneration, preventing itching and scaling**

The care stocking is perfume-free and tested in accordance with Standard 100 by OEKO-TEX® as a guarantee of its safety.

of patients suffer from dry skin*

of patients suffer from itching*

of patients think it is important that compression stockings do not cause skin problems**

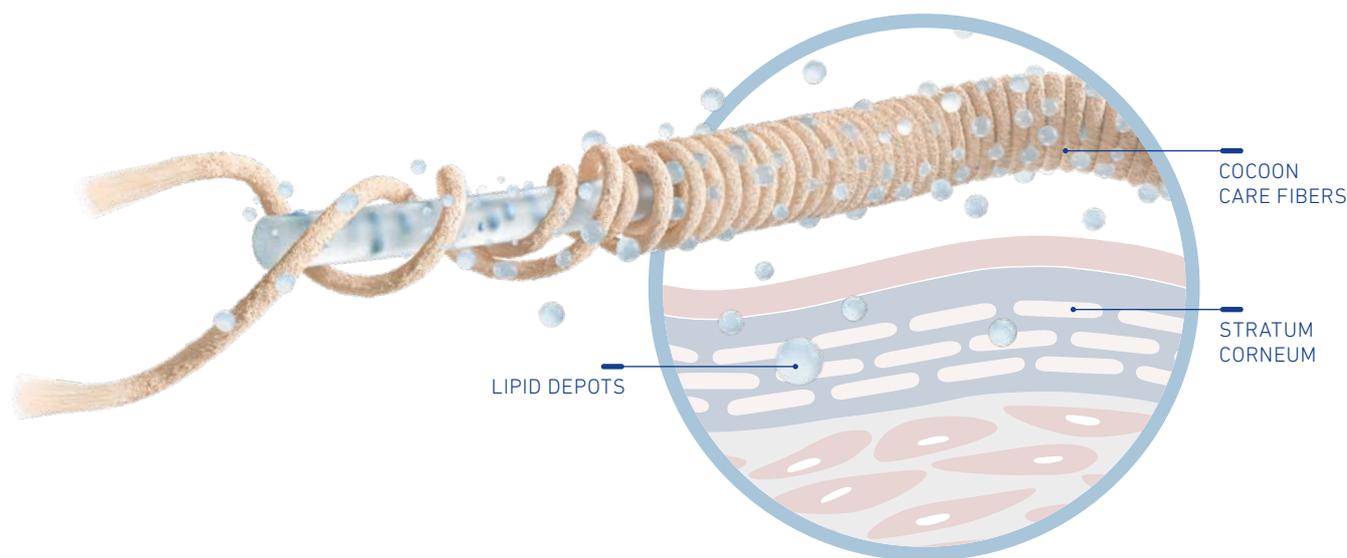

"WITH COCOON, CARE STARTS IN THE FIBERS"

"The stocking is called cocoon because we wanted to connect the properties with a word. And I think we managed to do that. A 'surrounding and protecting cover' fits this stocking perfectly," Gerti Stegmann explains, Product Developer in the Bauerfeind Innovation Center.

* Int Angiol. 2009 Oct; 28(5): 385-93. Quality of life and patients view of compression therapy. Reich-Schupke S., Murmann F., Altmeyer P., Stücker M., Source Department of Dermatology, Ruhr University Bochum, Bochum, Germany, PMID: 19935593.

** Allensbacher Archiv, IFD-Umfrage 9691

THE TWO-IN-ONE MODE OF ACTION: SUPPORTS LONG-LASTING, NATURAL SKIN REGENERATION

The Venotrain cocoon consists of a new mix of natural fibers with an innovative cocoon care thread.

This thread contains special lipid depots with high-quality care substances, which are continuously applied to the skin when the stocking is worn.

The clinically tested lipid care complex works directly on the outermost layer of the skin – the stratum corneum. It supports long-lasting, natural skin regeneration and effectively prevents itching and scaling. Compression and genuine skincare: the combination that makes the Venotrain cocoon new and unique.

Dry, sensitive skin before wearing the Venotrain cocoon

Smooth, healthy skin after repeatedly wearing the Venotrain cocoon

"THIS COMBINATION IS COMPLETELY NEW!"

"The combination of materials, together with the active substance, is a completely new technology, never seen before."

Gerti Stegmann, Product Developer in the Bauerfeind Innovation Center

VenoTrain® impuls

POWERFUL SUPPORT FOR PRONOUNCED VENOUS INSUFFICIENCY

Produces a particularly deep action by exerting high working pressure with even the slightest muscle movements. Easy to put on and breathable thanks to microfibers.

Highly effective for advanced vein problems, post-thrombotic syndrome, follow-up care for healed ulcers, and therapy in the early stages of lymphedema (0–1).

STANDARD COLORS

FEATURES

- The short-stretch knitted fabric generates a high working pressure with even the slightest muscle movements

VenoTrain® ulcertec

FOR VENOUS LEG ULCERS

The combination of an overstocking with a patented rhomboid knitted fabric and a skin-friendly liner for holding the wound dressing in place makes this compression stocking easy to put on without any need for assistance.

The liners are also ideal for providing a continuous low level of compression during the night. These are available to order separately in a pack of three and are suitable for washing at high temperatures.

FEATURES

- Coordinated compression of overstocking and liner
- Unique compression profile that accelerates the healing process while ensuring exceptional patient comfort
- Differentiated treatment based on two designs within one compression class

39 – moderate

- Compression class 3 (34–46 mmHg)
- Liner with gentle compression providing a compression pressure in the lower range of compression class 3 in combination with the overstocking

46 – strong

- Compression class 3 (34–46 mmHg)
- Liner with moderate compression providing a compression pressure in the upper range of compression class 3 in combination with the overstocking

LYMPHOLOGICAL TREATMENT

Bauerfeind has a wide range of compression products for lymphological conditions which take into account the patients' different requirements.

The circular knit **VenoTrain soft** arm sleeve is generally used to treat mild arm lymphedema, and to prevent imminent arm lymphedema after removal of the lymph node in the armpit or during radiation treatment.

The circular knit **VenoTrain impuls** compression stocking combines a wide range of benefits: its breathable microfiber and firm compression thread offer unique wearing comfort with a high degree of effectiveness. Only very little movement is needed for the stocking to exert the required therapeutic pressure.

The flat-knit **VenoTrain delight** compression stocking is indicated for use in cases of advanced venous disorders and lymphedema. The breathable double-stretch knit is skin-friendly and easy to put on and take off. Additionally, the firm material offers a good shaping effect and is very durable.

Thanks to our custom-made **VenoTrain curaflow** flat knit products, we can offer lymphatic patients perfectly tailored solutions with more than 1,000 different options of combining products and additional features. The beneficial therapeutic features of the range include the knitted fabric's high microfiber content, the flat sensitive stitching, and special comfort zones such as the extra-soft area behind the knee.

VenoTrain® glider

COMPACT AID FOR PUTTING ON AND TAKING OFF STOCKINGS

The VenoTrain glider is a practical aid for putting on and taking off medical compression stockings. It can be prescribed by a physician.

The lightweight, hard-wearing material makes the stocking glide effortlessly over the arm or leg. It is suitable for compression stockings with an open or closed toe.

Saving space and time, it is the ideal companion when you're out and about.

FEATURES

- Extremely lightweight, robust, and tear-resistant
- Easy to handle
- Ideal for travel

VenoTrain® glider plus

ROBUST DORNING AID

The VenoTrain glider plus is a robust donning aid with an ergonomic design for all types of medical compression stockings. It can be prescribed by the physician.

Folding handles make it easy to put on the stockings, avoiding the need to bend down. It has been tested by an independent institute for ease of use, even for customers with restricted mobility.

FEATURES

- Compact, ergonomic design
- Light metal frame with folding handles
- Easy to use without the need for any great effort

Dispatch

at buyer's cost and risk even if the buyer does not bear the transportation cost. Disruptions of operations affecting us or any of our suppliers, lack of suitable personnel, strike, lockout and force majeure are causes for extending delivery and relieve us of any delivery obligation for the time of the obstruction.

Returns

outside the warranty terms are only accepted after prior advise and approval of Bauerfeind to the return, provided the delivery documents are submitted; it is supposed that the returned goods are in proper state. We reserve the right of rejecting the acceptance of any returned consignment. We charge an administration fee of € 10 for every consignment returned outside the warranty period. The administrative fee for goods returned 1 month or more after the date of delivery is additionally 20 percent of the net order value, subject to a maximum of € 25 per article and piece; the fee is additionally 40 percent of the net order value of goods returned between 6 months and 12 months after the delivery date, subject to a maximum fee of € 50 for each article and piece. Goods returned outside the warranty, especially custom made products, and 12 months or more after the date of delivery will not be accepted back.

Payment

to be made immediately after presentation of the invoice. First deliveries are only made against advance payment. If the customer is in default, any further delivery will only be made against advance payment. We charge interest on arrears at the rate of 8 percent above the applicable base rate from the time at which payment is delayed. Payments by check, draft, etc. are deemed to be made when the amount has finally been credited to our account.

Retention of title

We retain the title to all goods delivered until the buyer has paid all amounts outstanding under our business relations with him. The retention of title also applies proportionately to goods which have been processed or otherwise modified. If the goods are sold all claims on third parties are deemed to have been assigned to us without proviso up to the total amount owing to us. Notwithstanding the assignment, the buyer is entitled to the collection of these amounts. Our right to collect the amounts is not affected by the preceding provision; however, we undertake to refrain from collection unless the buyer defaults on payment. If the buyer defaults on payment we can demand that the buyer disclose the assigned claims and the names of the debtors, provides all information required for collection of the debt, delivers all required documents and informs the debtors (third party) of the assignment. The buyer is not permitted to sell, hypothecate or assign the goods as security. Hypothecation, confiscation or any other action of constraint taken by a third party shall be communicated to us by the buyer

without delay and he shall provide all information and documents to enable us to defend our rights. We undertake to release, on the buyer's demand, any security which exceeds a secured claim that has not been satisfied by more than 20 percent.

Complaints

Warranty claims due to obvious defects expire unless notified to us in writing without delay within the meaning of Article 377 HGB (German Commercial Code). For the rest, the time bar for warranty claims is 1 year after delivery of the goods purchased. If the goods are defective, we make replacement delivery or repair the goods at our choice. For reasons of hygiene, repairs can only be made to washed goods and goods which are of good hygienic condition. We will reserve the right of charging an adequate administration fee if unwashed goods are returned. If and to the extent to which we fulfil our duties of supplementary performance, in particular, the repair of defects or delivery of goods without defect, the customer cannot demand a price reduction or rescind the contract unless our attempts at supplementary performance have failed. Defects which are due to normal wear and tear, overstrain, misuse, neglect of care or non-compliance with the instructions for use are not covered by warranty.

Liability

for damage is excluded unless we or our servants are found to have acted with gross negligence or intention. This limitation of liability does not apply to damage due to injury of life, body or health or the violation of a major contractual duty.

Legal venue

The place of performance is the business seat of this company. The legal venue for all controversies from the business relations is Gera.

Partial invalidity

If any provision in these Terms of Sale and Delivery should be or become invalid or unenforceable, the other provisions will not be affected by this. The ineffective or unenforceable provision will be substituted by a valid and enforceable provision which reflects the original intention of the parties as closely as possible.

Data protection clause / call recording

For quality purposes, we randomly record calls between the buyer and our employees. The phone records exclusively serve the purpose of improving our performance and are deleted after evaluation. The data will not be disclosed to third parties. The buyer hereby consents to the records of telephone calls to that sole purpose. Consent is voluntary and may be revoked at any time in the future by the buyer.
